TARGET PUBLIC

Nurses, x-ray technicians, health cadres

Prerequisites: belonging to the target public, unless exempted following file review

GENERAL AND EDUCATIONAL OBJECTIVES

At the end of the course, learners will be able to use and maintain the various implanted and externalised devices in compliance with the new French Society of Hospital Hygiene (SF2H) recommendations.

In order to achieve the operational goal, learners must be able to:

- List devices' characteristics (IPC, PICC and midline)
- Use the various devices (secured and unsecured Huber needles, prefilled saline syringes, specific care sets)
- Identify risks and implement preventive actions
- Apply SF2H recommendations on best practices regarding central venous devices (placement, use, maintenance, monitoring, indications, rinsing and positive pressure techniques, methods for removal and change, and organisation of outpatient care)
- Manage complications (infectious, thrombotic, mechanical, operational problems, and extravasation). Inform and involve the patient and/or their circle in management of the device
- Ensure traceability of actions carried out, devices used and situations encountered, on the mediums provided
- Keep a watch on new recommendations

ORGANISATION

- 1 hour of pre-training e-learning in order to review the basics and homogenise learners' level
- 7 hours of simulation in face-to-face training

Number of simulation scenarios per session :
4 scenarios

Context :

- Methods and teaching aids: expository, demonstrative, interrogative and active methods. Interactive presentations, quizzes, scientific articles, films, self-assessment, practical workshops on manipulation of devices and simulation of maintenance and use of LTIDS.
- Assessment method: online pre- and post-training MCQ. Self-assessment of operational capacity

GROUP SIZE

8 learners per session

Facilitators: Christelle Courtiol (IFSI trainer, former health cadre at the ICL) & Dominique Tinchant (RN at the ICL) the requirements of an effective debriefing

COST

€350 per learner
